Frontend Software Engineer with 3+ years of experience in the full lifecycle of scalable web application development. Specialist in React, TypeScript, and Next.js, focusing on Frontend Architecture, Technical SEO, and Performance Optimization (Core Web Vitals). Proven track record of delivering robust systems, maintaining clean code, and improving performance metrics in large-scale projects.

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3.

Testing & Quality Assurance: Jest, Vitest, Cypress, TDD, Code Review, Clean Code.

Performance & Tools: Lighthouse, Core Web Vitals, SEO, Git/GitHub, CI/CD, System Design.

PROFESSIONAL EXPERIENCE

Software Engineer — Frontend

May 2026 - Present

Softplus

- Lead the frontend architecture for a next-generation Auto-Configuration System (ACS) for Internet Service Providers (ISPs), focusing on extending CWMP, TR-069, and TR-181 standards.
- Engineered and scaled the platform to support client base growth from 3,000 to over 20,000 active users.
- Implemented critical performance optimizations using Lighthouse, achieving a speed gain of over 50% and significantly improving user experience.
- Mentor junior developers and conduct comprehensive code reviews to ensure software quality and maintainability.
- *Stack:* React, TypeScript, Next.js, Jest, Vitest, Cypress.

Software Engineer — Frontend

Feb 2022 - Dec 2024

Geodatin

- Managed the full-cycle development of web solutions for public and private sectors, including high-impact government platforms (Caburé, IDESAM).
- Designed and implemented complex dashboards with data visualization and interactive maps, facilitating strategic decision-making.
- Maintained high performance and SEO metrics across all applications by applying advanced web optimization practices.
- Collaborated on sprint planning and technical requirement definitions for new features.
- *Stack:* React, TypeScript, Next.js, Jest, Vitest, Cypress.

IT Security Intern

Sep 2021 - Jan 2022

Grupo Meddi

- Managed user access control and identity using LDAP directory services and Active Directory.
- Administered firewall policies (FortiNet) for traffic monitoring and corporate network infrastructure protection.
- Supported security incident response and preventive maintenance of critical systems.
- *Stack:* Cybersecurity, Active Directory, Fortinet, Firewall, Network Access.

EDUCATION

B.Sc. in Computer Engineering

Feb 2019 - Present

Universidade Estadual de Feira de Santana (UEFS)

Associate Degree in IT (Technician)

Feb 2015 - Dec 2018

Instituto Federal de Educação, Ciência e Tecnologia da Bahia (IFBA)

PROJECTS

WillFall.NET

[Repository Link](#)

- Developed a computer network simulator based on Graph Theory, allowing interactive visualization of packet routing.
- Implemented Dijkstra's Algorithm for real-time calculation and visualization of shortest paths between network nodes.
- Built a robust graphical user interface (GUI) using Java Swing/AWT libraries.
- *Stack:* Java, Swing, Algorithms, Data Structures.

BusOn

[Repository Link](#)

- Created a complete e-commerce platform for bus ticket sales and management, including an admin dashboard and customer portal.
- Implemented automated reporting systems to track sales performance and team productivity.
- Ensured data security and integrity through automated backup and recovery routines.
- *Stack: Laravel (PHP), MySQL, Bootstrap, MVC.*

KLEM - Kids Learning English Mobile

[Repository Link](#)

- Developed an educational mobile game for Android focused on teaching English to children, applying ubiquitous computing concepts.
- Designed the user experience (UX) tailored for children, featuring immediate visual and auditory feedback.
- *Stack: Java, Android SDK, Mobile Development.*

CERTIFICATIONS

- Building your first API with Sequelize (Node.js)
- Modern Web Development with Laravel
- GNU/Linux System Administration (Intermediate Level)

LANGUAGES

- **Portuguese:** Native
- **English:** Basic (Advanced Technical Reading)
